Friend,

This bears repeating, Coast Range forests are some of the best forests in the world, per acre, at storing carbon. In light of this fact, any proposal that takes on the climate crisis in Oregon *must* include a bold new vision for the private industrial forest estate.

That is what we are fighting for every day, and it is your [support](#) that gets this message to the people who need to hear it the most. This month we have been deeply engaged in writing an extensive critique of the industrial forest estate. The document outlines a progressive land reform agenda funded through a Green New Deal. We see this as the only **just** path forward to remove the massive investment based timber companies from our forests while providing for the people of Oregon. We look forward to the release of this analysis in the fall.

We continue to work with several coalitions to imagine a Green New Deal for Oregon's forests and a strong climate agenda for the Oregon coast. We are excited to be using cutting edge communication tools and organizing tactics to push this message as far as possible in order to enact real change.

Remember, we are in a climate crisis, one of many interconnected crises of today. Oregon's forests are one of the best tool we have to contribute to an urgent climate solution. Thanks again for your support of this deep visioning, researching, and organizing work. We

appreciate your encouragement. If you would like to become more involved, please [reach out](#).

## New Episodes of Coast Range Radio

We are excited that the Coast Range Association's radio show and podcast, Coast Range Radio, is gaining traction! We are now aired on six community radio stations with more in the works. We also have a strong internet following for the podcast. However we need you to tune in and spread the word!

You can listen to Coast Range Radio on our [website](#) or on a podcast platform of your choice (Apple Podcasts, Spotify, Stitcher and more). It really helps us if you subscribe, share, rate and review the show. Doing those quick things helps more listeners find us.

You can follow the Coast Range Association on [Facebook](#), [Twitter](#) and [Instagram](#) to get the latest updates and share our most recent shows. Finally, will you become a [monthly donor](#) to support Coast Range Radio? For as little as \$5-\$10 a month you can ensure the most important stories for our region are being heard.

## JOHN BOROWSKI

An educator's perspective on the timber industry's influence on Oregon's public schools

FIND COAST RANGE RADIO ON ALL PODCASTING PLATFORMS OR [COASTRANGE.ORG](http://COASTRANGE.ORG)

Coast Range Radio interviews John Borowski. John is a long time marine and environmental science educator in Oregon. In our discussion, John draws from his years of experience to describe the power timber and fossil fuel companies have in influencing science education. Of specific interest, John outlines how the Oregon Forest Resources Institute's (OFRI) timber focused materials enter Oregon's schools and influence environmental education.

## JOEL IBOA

Environmental justice in Oregon

LISTEN ON ALL PODCASTING PLATFORMS OR [COASTRANGE.ORG](http://COASTRANGE.ORG)

Coast Range Radio interviews Joel Iboa. Joel is the coalition manager for Causa Oregon—Oregon's immigrant rights organization. Joel currently serves as chair of the Eugene Human Rights Commission. Joel is also the youngest person to be elected chair for the Oregon governor's Environmental Justice Task Force.

We discuss Joel's work at Causa during the Covid-19 pandemic, environmental justice in Oregon, rural justice organizing, justice for immigrant forest workers and the opportunities of a Green New Deal for Oregon.
